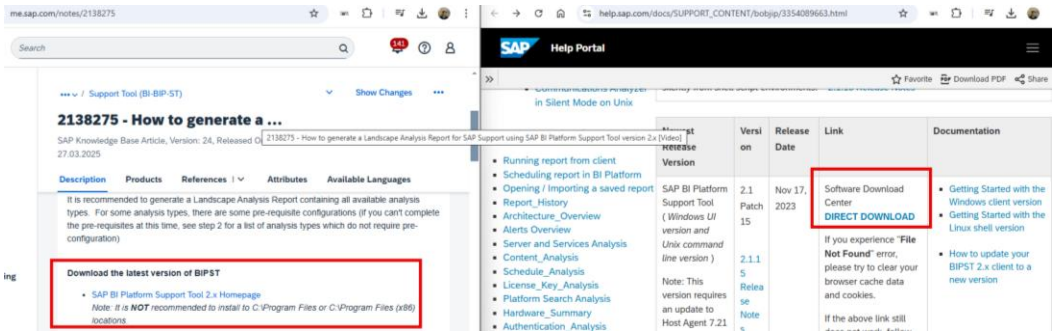
BUSINESS OBJECTS ASSESSMENT DATA COLLECTION INSTRUCTIONS

BI PLATFORM SUPPORT TOOL LANDSCAPE ANALYSIS REPORT (PART 1/4)

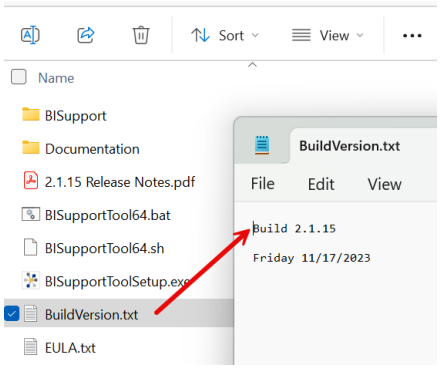
1. Download the latest version of the BI Platform Support Tool on your laptop (or any local windows machine) that can access the CMS server port. Use the link below to download.

   https://help.sap.com/docs/SUPPORT_CONTENT/bobjip/3354089663.html

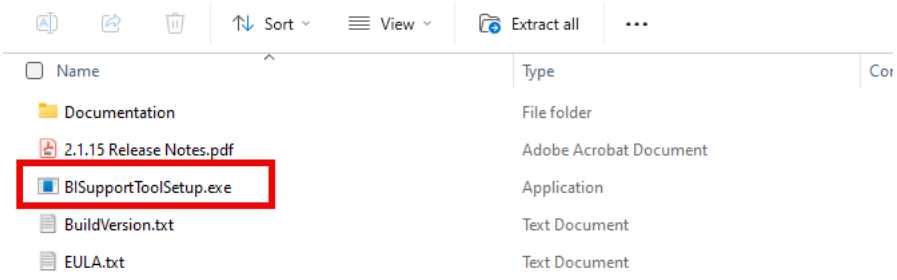


Note:

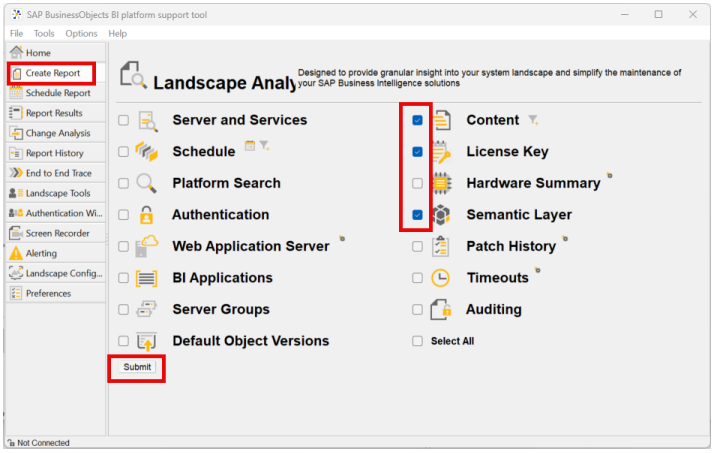
- Refer Steps 3, if you already have installed BI platform support tool version 2.1 or above.
- BI platform support tool version can be verified under the install directory as below



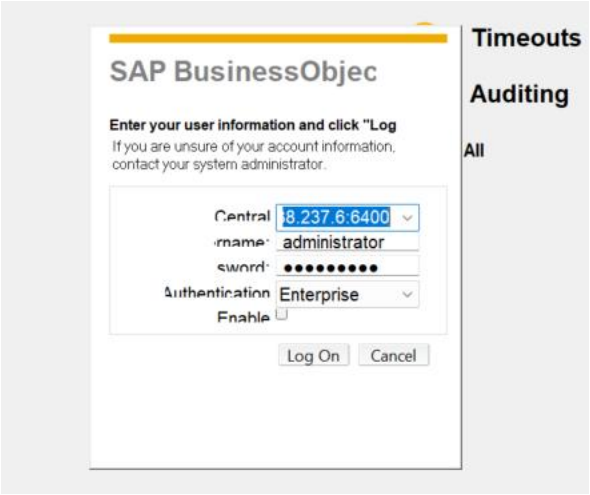
2. Install the software (check if the user has required admin rights in the system to install)



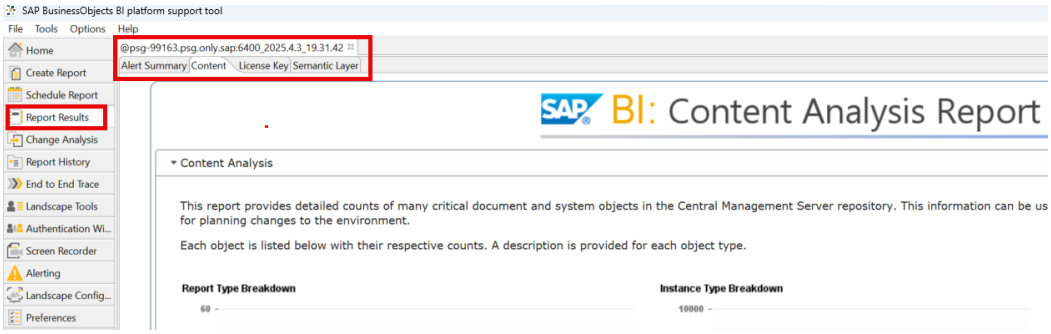
3. After installation, the below screen should popup (Alternatively double click on the file “BISupportTool64.bat” in the install directory)
    - To create a new Landscape Analysis Report, click Create Report on the left navigation bar.
    - Select the following options and then click Submit
        - Content
        - License Key
        - Semantic Layer



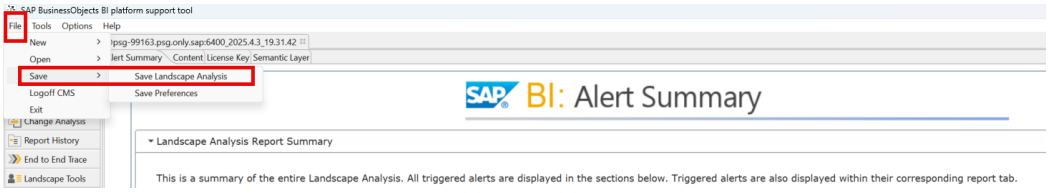
4. Next, you will be prompted to logon to the CMS system. The CMS system (server:port) chosen here is used to lookup the landscape definition.



5. Once the report has completed processing, it will automatically be displayed in the Report Results viewing window



6. To save the Landscape Analysis Report, click File > Save > Save Landscape Analysis. This will save the currently selected report tab as html files and data XML in a compressed ZIP file. Browse to the location where you want to save the ZIP file and click Save.

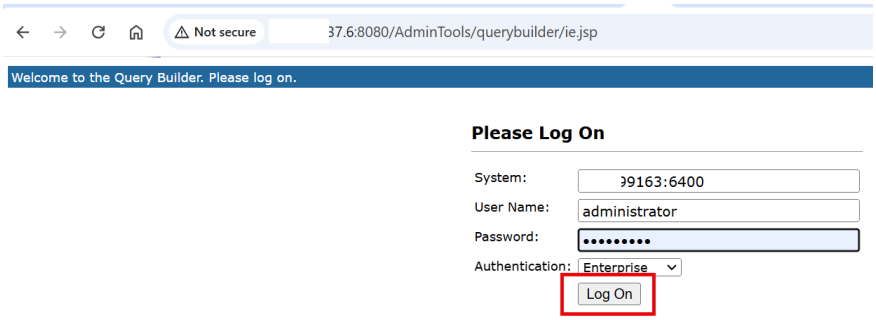


In case of issues, refer to https://me.sap.com/notes/2138275

QUERY BUILDER SCRIPT OUTPUT (PART 2/4)

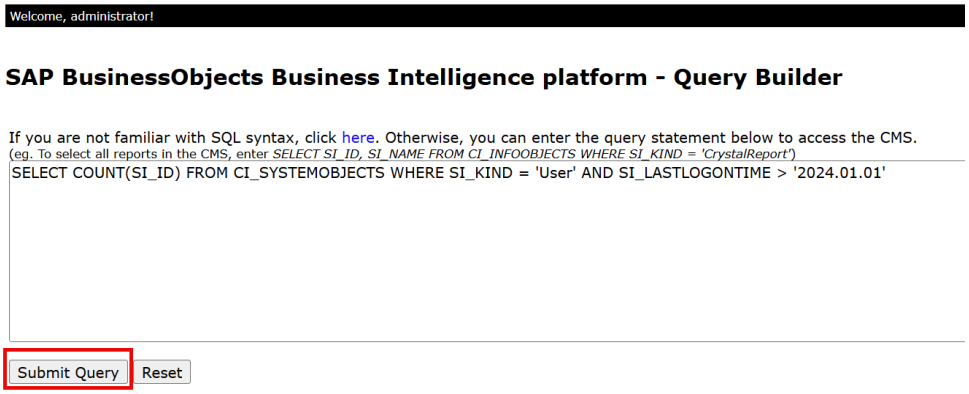
1. To access the Query Builder directly from the JAVA web application server, use the following URL: http://<WebApplicationServer>:<port>/AdminTools

2. Provide the login credentials (preferably administrator) and click logon



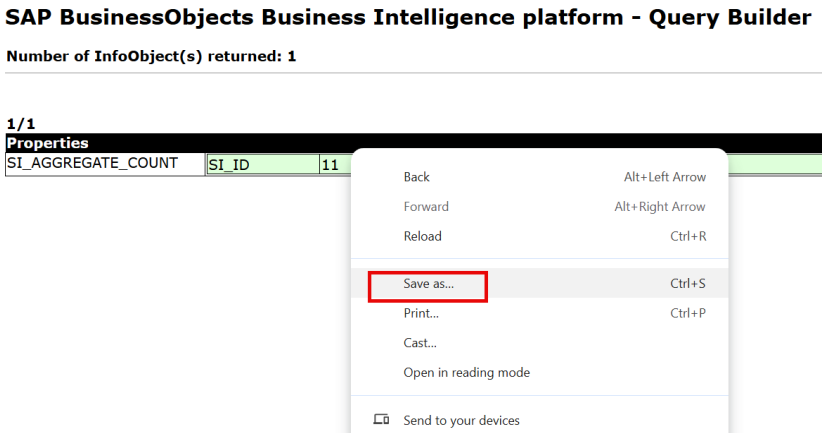
3. Execute the below Query

SELECT COUNT(SI_ID) FROM CI_SYSTEMOBJECTS WHERE SI_KIND = 'User' AND SI_LASTLOGONTIME > '2025.01.01'

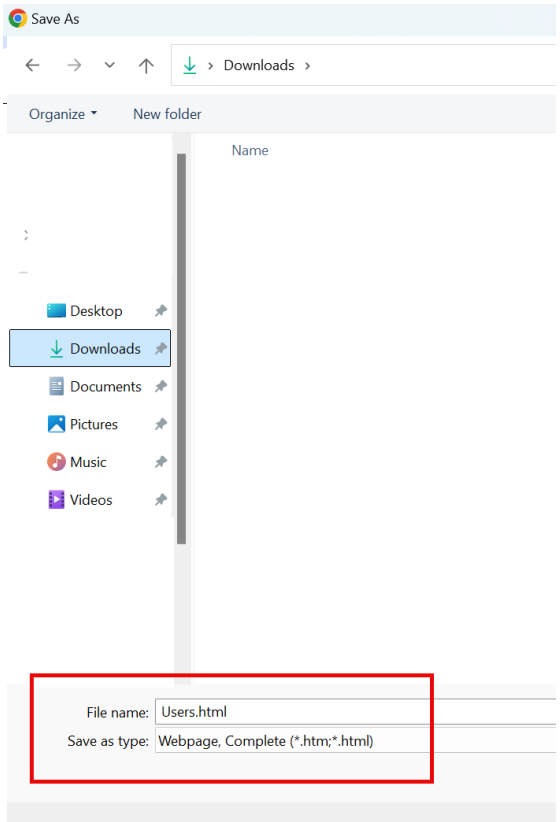


4. After clicking submit button, save the results as **Users.html** file

- Right click → Save as



- File Name: Users.html
- Save as Type: Webpage, Complete (*.htm, *.html)



5. Execute the second Query

```
SELECT TOP 100000 SI_ID, SI_KIND,
SI_PROCESSINFO.SI_PROCESSINFO_PER_DOC,
SI_SCHEDULEINFO.SI_DESTINATIONS FROM CI_INFOOBJECTS
WHERE SI_INSTANCE=1 AND SI_RECURRING=1 AND
SI_SCHEDULE_STATUS=9
```

6. After clicking submit button, save the results as **Scheduling.html** file
    - Right click → Save as
    - File Name: Scheduling.html
    - Save as Type: Webpage, Complete (*.htm, *.html)

In case of issues, refer to https://me.sap.com/notes/0001206301

MODIFIED DATE EXTRACT (PART 3/4)

1. Run the below query and save the output as:

```
SELECT TOP 200000 SI_UPDATE_TS
FROM CI_INFOOBJECTS
```

2. Save the results as **Modified_Insight.html**

REPORT INVENTORY BY LOCATION (PART 4/4)

1. Run the below query **three times**, each time changing only the value of SI_ANCESTOR and save the output using the file names listed below.

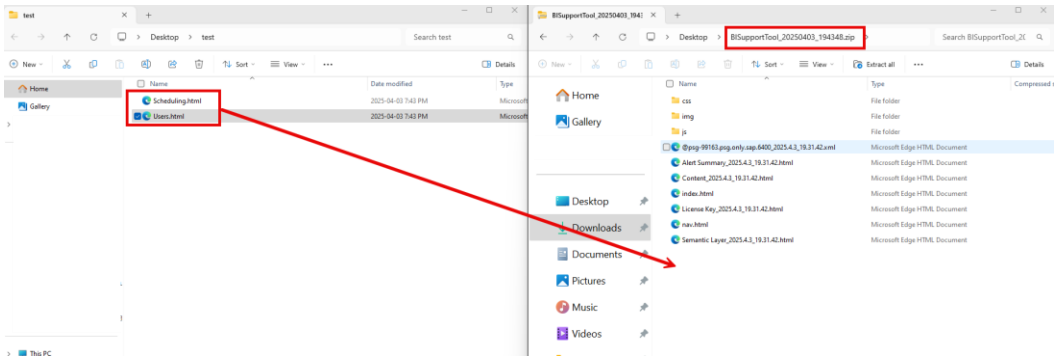
```
SELECT SI_ID, SI_NAME, SI_KIND, SI_PARENTID,
SI_REPORT_ENGINE_TYPE
FROM CI_INFOOBJECTS
WHERE SI_INSTANCE = 0
AND SI_ANCESTOR = 23
AND (
   SI_KIND = 'Webi'
   OR SI_KIND = 'CrystalReport'
   OR SI_KIND = 'Analysis'
   OR SI_KIND = 'OLAP'
   OR SI_KIND = 'AnalysisView'
   OR SI_KIND = 'DesignStudio'
   OR SI_KIND = 'ExplorationView'
   OR SI_KIND = 'InfoSpace'
   OR SI_KIND = 'XL.XcelsiusEnterprise'
   OR SI_KIND = 'Agnostic'
)
```

2. Run the same query with the following SI_ANCESTOR values:
   - Replace SI_ANCESTOR = 23 with SI_ANCESTOR = 18
     Save the output as Favourite.html
   - Keep SI_ANCESTOR = 23
     Save the output as PublicFolder.html
   - Replace SI_ANCESTOR = 23 with SI_ANCESTOR = 49
     Save the output as Inbox.html

SHARING THE GENERATED CONTENT WITH SAP

1. After following the above steps, you would have seven files generated
    - BISupportTool__.zip
    - Scheduling.html
    - Users.html
    - Modified_Insight.html
    - Favourite.html
    - PublicFolder.html
    - Inbox.html

2. Move Scheduling.html, Users.html, Modified_Insight.html, Favourite.html, PublicFolder.html, Inbox.html files into BISupportTool__.zip



3. Share the .zip file with SAP **using the Shared folder provided in the onboarding email**
