

Readiness assessment for BDC - BW on HANA Assessment (BPC option) – Instructions

This document describes the instructions to **execute a readiness assessment for BDC in your BW on HANA** system with the option to include BPC.

The operation is performed on **your productive BW system**.

All scripts are read-only (SELECT statements on metadata/statistics).

There is no impact on master data or transactional data.

Pre-requirements

BW Layer:

- Access to the BW production system via SAP Logon
- Authorization to run DB02 / DBACOCKPIT
- A valid ABAP user with read access to the BW Schema
- **Ensure SQL Editor limits are set to 1,000,000 records**

Steps

1. Select the scripts from the GitHub package provided (already aligned to your system):

- a) Retrieve the 2 BW SQL scripts:
 - Base Tables.txt
 - Stat Tables.txt
- b) Retrieve BPC script:
 - BW Planning Tables.txt

2. Execute the BW SQL scripts in DB02/DBACOCKPIT

- a) Log in to BW production via SAP Logon
- b) Open DB02 or DBACOCKPIT, then SQL Editor
- c) Copy/paste each BW script and execute
- d) After running each script, in the result screen:
 - Click **Export** → **Spreadsheet**
 - **Choose file type: Excel (in .XLSX format)**

- e) Download the outputs as Excel files
 - Base Tables → Base Tables.xlsx
 - Stat Tables → Stat Tables.xlsx
 - BW Planning → BW Planning Tables.xlsx

3. Execute SAP Note 2296290

Run the sizing note across the system: <https://me.sap.com/notes/2296290/E>

4. Upload all the resulting generated files to the SAP shared folder mentioned in the onboarding email according to the naming convention mentioned previously

5. Once you uploaded all the required files, please rename this file from:

ko.txt to ok.txt

Renaming this file will notify the SAP assessment team and will automatically trigger the next step of the onboarding process.

Notes

- If you encounter error “Invalid table name: could not find UJA_APPL”, use folder: Special exceptions BW4HANA no planning
- For assistance, contact us anytime at: BDC_ASSESSMENT_COORDINATION@sap.com
